Cell phone number: +967 523 180

Front End: React.js, Vue.js, Redux, CSS, SASS, styled-components.

Programming languages: JavaScript, TypeScript, Dart, Python.

Soft skills: Pensamiento crítico, Trabajo en equipo.

Responsive Web Design / freeCodeCamp

DECEMBER 2021 - JANUARY 2022

Full Stack developer with JavaScript / Platzi

JANUARY 2022 - DECEMBER 2022

Mobile development bootcamp with Flutter / Code by Tecsup

NOVEMBER 2022 - APRIL 2023

Design and development of the virtual store PREVENT NATURE – 2022

- I designed the PREVENT NATURE website with Figma, using a responsive design approach to ensure an optimal user experience on any device.
- I developed the website using HTML, CSS and JavaScript, and focused it for mobile devices. Also, I created a JSON file to simulate an API and load the blog and products dynamically with JavaScript using Async/Await.

Front End Mentor challenge solutions development- 2023

- Design and develop a web page to showcase Front End Mentor solutions, using Figma and React.js. Create a JSON file that simulates an API, plus use a custom hook and useContext to load the information in an efficient way.
 - Most of the solutions have been developed using React.js and Vue.js, with a focus on the mobile user experience. I strove to maintain the integrity of the original design, while implementing creative solutions. By the way, the application has more than 15 solutions.
